Q-1)

1. Complete the use case diagram for the above problem text along with use case documentation for “issueBook” use case.

UseCase Description: -

Use case name: Issue Book

Description: Represents the process of Issuing book

Primary Actors: Registered Students

Secondary Actors: Library, Librarian

Pre-conditions:

- Registered student must be logged in and authenticated by the librarian.
- The book being issued must be available in the library.

Post-conditions:

- The book is marked as issued to the student.
- The due date for returning the book is set.
- The student is notified of the successful issuance.

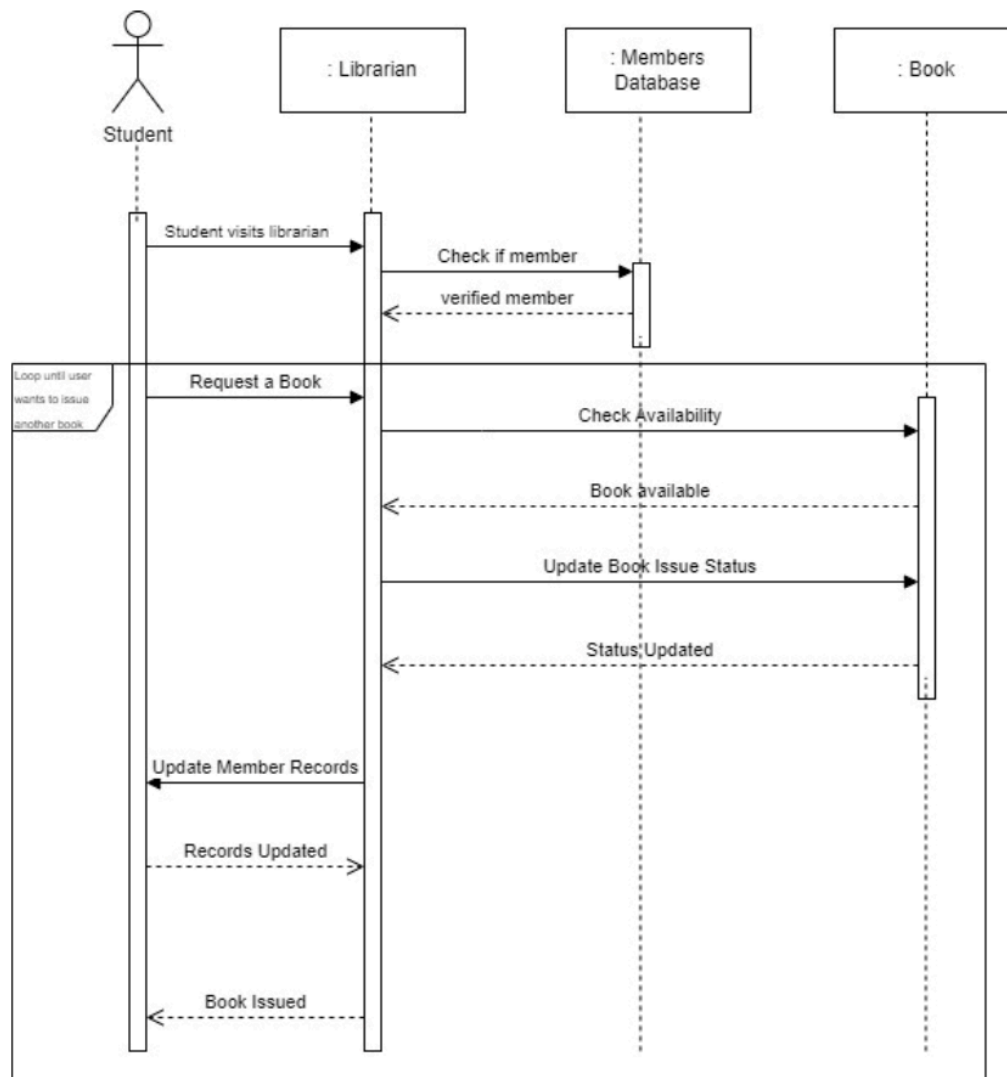

Main flow:

- The registered student requests to issue a book.
- The system validates the student's authentication status.
- The system checks if the requested book is available.
- If the book is available, the system marks it as issued to the student.
- The system sets the due date for returning the book.
- The system notifies the student and the librarian about the successful issuance.

Alternate flows:

- If the book is not available, the system notifies the student that the book cannot be issued at the moment.
- If the user is not authenticated, the system notifies the librarian.

2. The sequence diagram for the “issueBook” use case.

Entities:

- Book: Represents individual book with ISBN to check availability
- Student: Student with unique student ID borrow books from library
- Transaction: Represents any interaction between student and library.

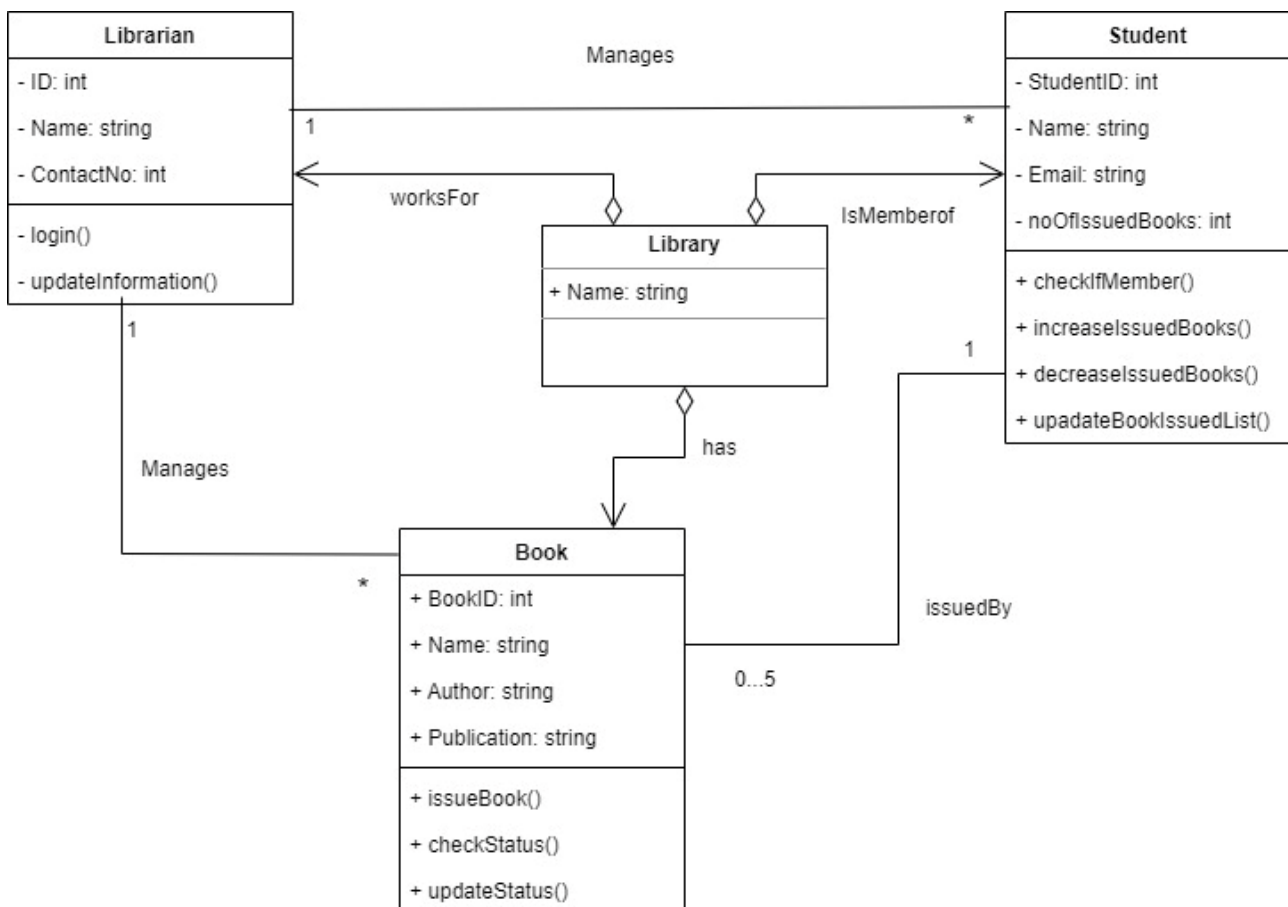

Boundary Objects :

- Librarian/Student Interface: The library management system has the interface where the transaction would happen and both of them interact.
- Barcode reader (If available): Can be considered as a hardware component used to read barcode on the book.

Control Objects :

- Fine calculator: Calculates fine for the delayed submitted books.
- Database system: Has the collection of information of books, verified librarian and student information.
- Library management system: This Library management system itself can be considered as a control object as it manages and organize all the procedure or transaction.

3. Draw the analysis object diagram for the “issueBook” use case analysis.

Q-2)

sequence diagram for the given Examination Management Process.
